

Nashville, TN (2001)

ERI President & CEO, Tom Silliman

The Nashville, TN tower was built for Richland Towers on top of a mountain. The site presented unique design and installation challenges since 2 of the guy anchor points had 200' elevation drops from the elevation at the base of the tower. The tower is 1270' tall and has a 12' face, 75' candelabra, double car elevator with staircase, and a 10' wide wrap-around communications platform. The tower was designed to exceed TIA/EIA 222-F requirements.

Completed Tower
