The depth and breadth of broadcast products offered by Electronics Research is only exceeded by the quality of professional services performed to complement these products. With an industry leading team of engineers, project managers, draftsmen, field technicians, and manufacturing staff, ERI delivers a range of services found nowhere else.

Our Professional Service Team activities include:

- Antenna Test Range
- Turn Key Installation
- Structural Analysis
- After Sales Maintenance and Inspection
- Tower Reinforcement and Rescue
- Transmission Line System Design and Layout
- System Optimization Testing Service
- System Optimization Tuner
- Field Technical Advisory Service
- Site Survey and Inspection Services
