

Maintenance and Inspection

Keeping your investment maintained will give you peace of mind and insure your place in the market. Do you feel confident that your system is in peak condition and ready for anything?

ERI's engineers use their experience and knowledge to perform maintenance and inspection programs to improve the longevity and quality of your system. Our maintenance and inspection teams have been utilized by both the industries largest corporations and the ever-strong, mom and pop stations. ERI has a history of rock-solid performance providing our customers with quality broadcast, structural, lightning protection, and grounding systems.

Allow the professionals at ERI to inspect your site and provide the reports on a quarterly, annual, or semi-annual basis. The condition of your investment will ultimately reflect the condition of your future.
